# Getting Started With TensorFlow

## Synopsis

Key Features  
Get the first book on the market that shows you the key aspects TensorFlow, how it works, and how to use it for the second generation of machine learning  
Want to perform faster and more accurate computations in the field of data science? This book will acquaint you with an all-new refreshing libraryâTensorFlow!  
Dive into the next generation of numerical computing and get the most out of your data with this quick guide  
Book Description  
Google's TensorFlow engine, after much fanfare, has evolved into a robust, user-friendly, and customizable, application-grade software library of machine learning (ML) code for numerical computation and neural networks. This book takes you through the practical software implementation of various machine learning techniques with TensorFlow. In the first few chapters, you'll gain familiarity with the framework and perform the mathematical operations required for data analysis. As you progress further, you'll learn to implement various machine learning techniques such as classification, clustering, neural networks, and deep learning through practical examples. By the end of this book, youâll have gained hands-on experience of using TensorFlow and building classification, image recognition systems, language processing, and information retrieving systems for your application. What you will learn  
Install and adopt TensorFlow in your Python environment to solve mathematical problems  
Get to know the basic machine and deep learning concepts  
Train and test neural networks to fit your data model  
Make predictions using regression algorithms  
Analyze your data with a clustering procedure  
Develop algorithms for clustering and data classification  
Use GPU computing to analyze big data  
About the Author  
Giancarlo Zaccone has more than 10 years of experience managing research projects in both the scientific and industrial domains. He worked as researcher at the C.N.R, the National Research Council, where he was involved in projects related to parallel numerical computing and scientific visualization. Currently, he is a senior software engineer at a consulting company developing and maintaining software systems for space and defence applications. Giancarlo holds a master's degree in physics from the Federico II of Naples and a 2nd level postgraduate master course in scientific computing from La Sapienza of Rome. He has already been a Packt author for the following book: Python Parallel Programming Cookbook. You can contact him at <https://it.linkedin.com/in/giancarlozaccone>  
Table of Contents  
TensorFlow â Basic Concepts  
Doing Math with TensorFlow  
Starting with Machine Learning  
Introducing Neural Networks  
Deep Learning  
GPU Programming and Serving with TensorFlow

## Book Information

Paperback: 180 pages

Publisher: Packt Publishing - ebooks Account (July 29, 2016)

Language: English

ISBN-10: 1786468573

ISBN-13: 978-1786468574

Product Dimensions: 7.5 x 0.4 x 9.2 inches

Shipping Weight: 12 ounces (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #88,214 in Books (See Top 100 in Books) #14 in Books > Computers &

Technology > Computer Science > AI & Machine Learning > Computer Vision & Pattern

Recognition #53 in Books > Computers & Technology > Databases & Big Data > Data

Processing #76 in Books > Computers & Technology > Computer Science > AI & Machine

Learning > Intelligence & Semantics
